Welcome

Thank you for considering Growing Kind as a partner in your early learning environment.

We know how much thought, care and energy goes into creating spaces where children can truly play, explore and thrive.

This guide has been created to make that work a little easier. Whether you are setting up a new centre, refreshing existing rooms, or simply looking for inspiration and practical guidance.

Inside, you'll find who we are, how we approach play, how we work with centres, recommendations by age and room type, and examples of projects we have supported across Australia.

Our aim is simple: to help you create environments where children can explore, construct, connect and learn through play, and to make the planning and purchasing process as straightforward as possible.

We would be privileged to support your rooms and the children in them.

With kindness,

Alex and Erin

Who Are We

Growing Kind is more than a resource catalogue.

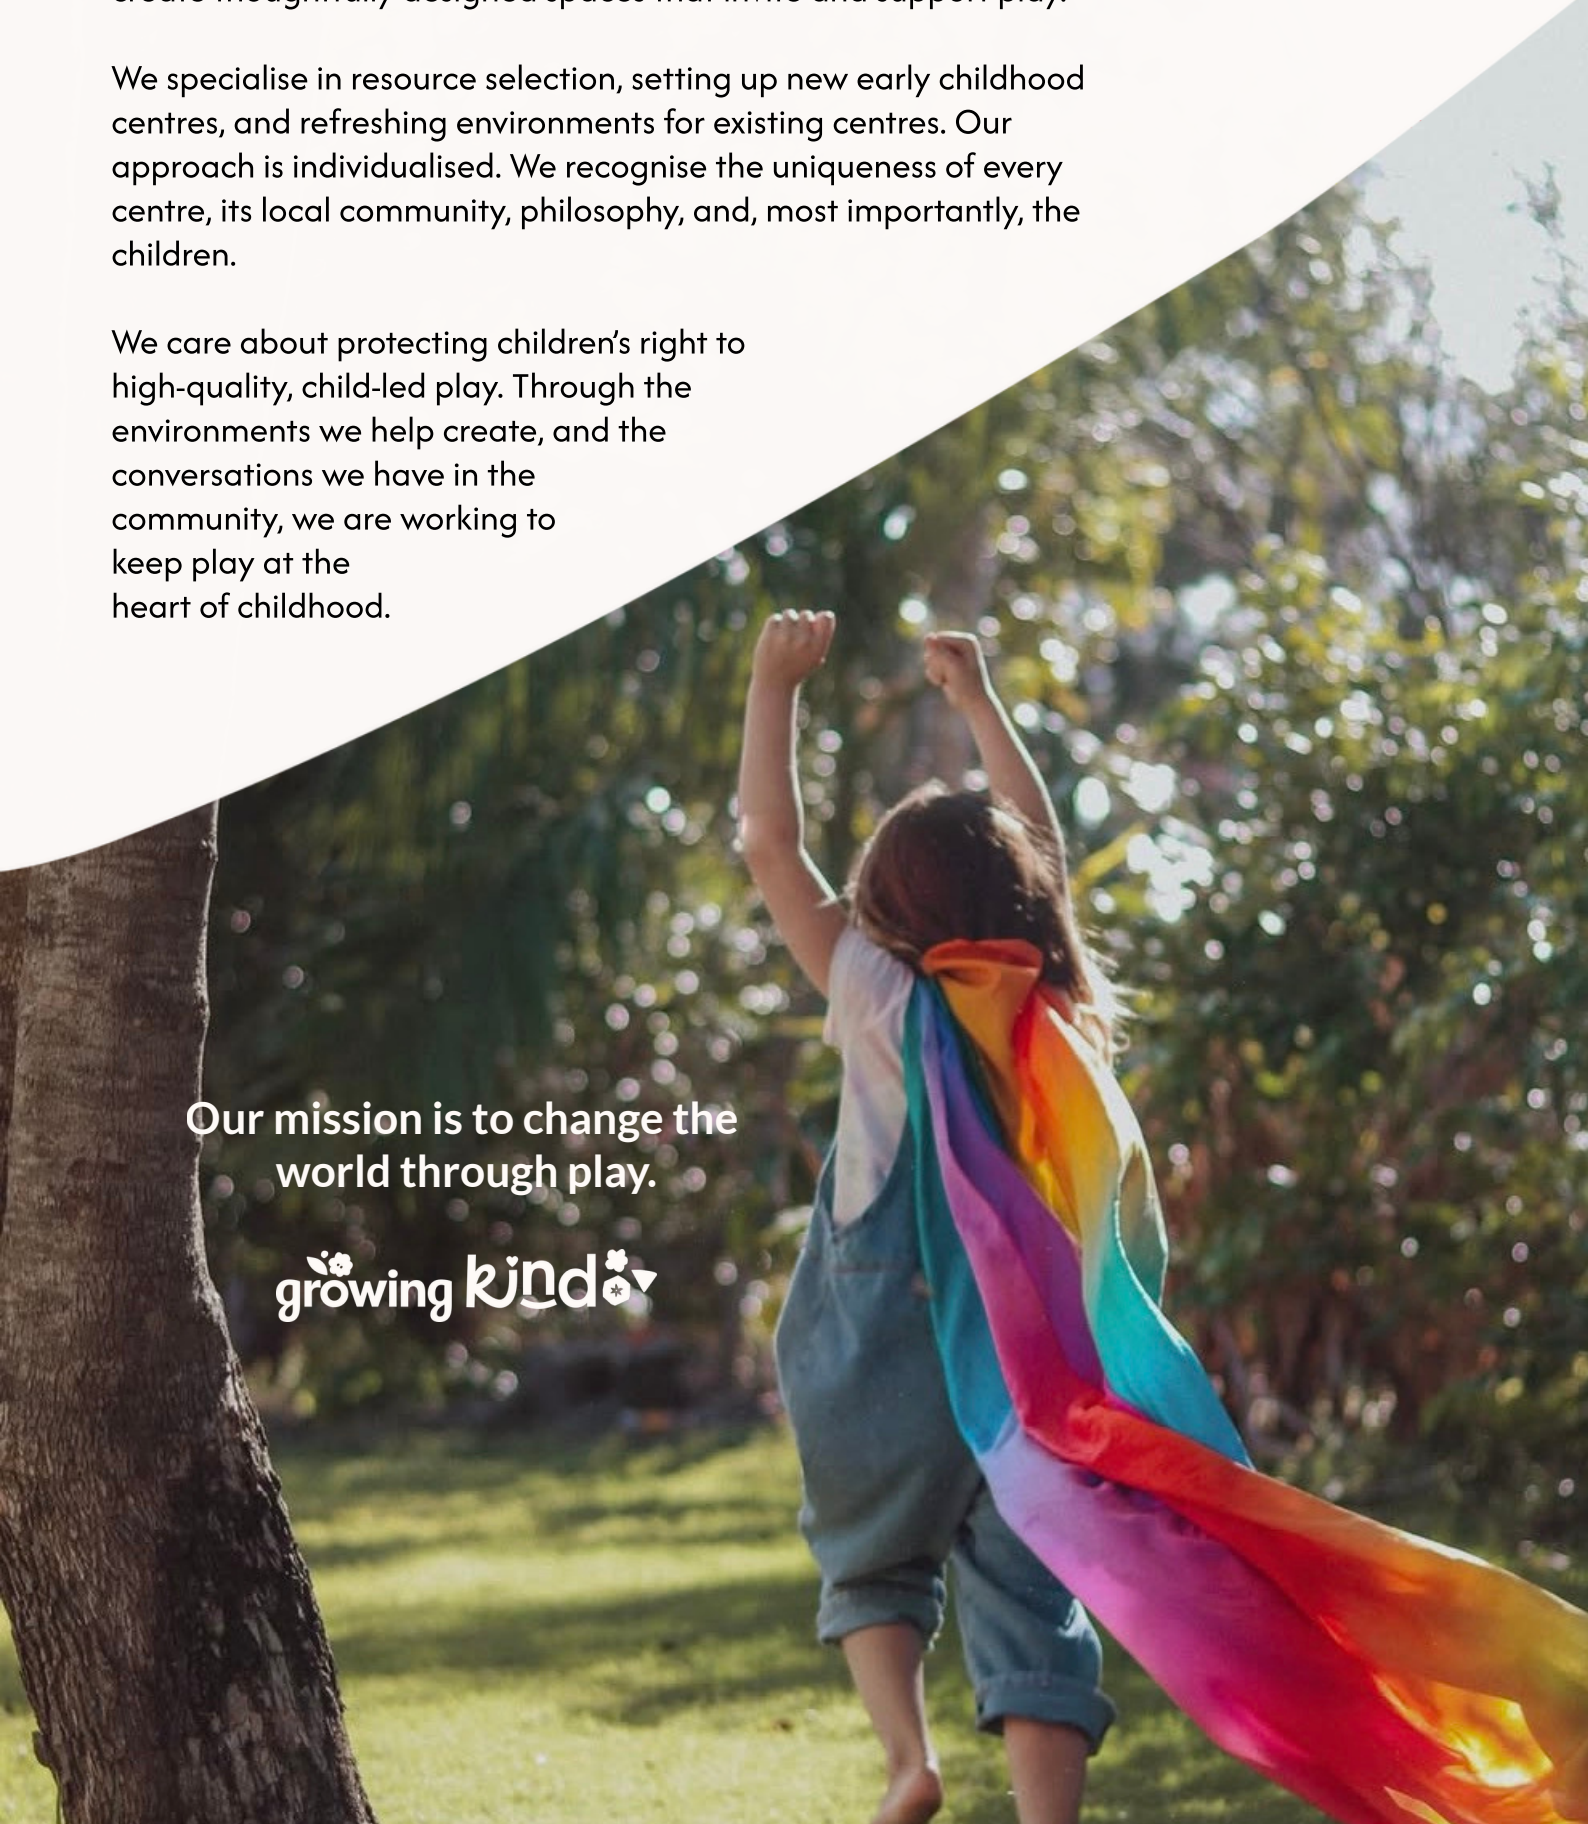

We partner with early learning environments across Australia to create thoughtfully designed spaces that invite and support play.

We specialise in resource selection, setting up new early childhood centres, and refreshing environments for existing centres. Our approach is individualised. We recognise the uniqueness of every centre, its local community, philosophy, and, most importantly, the children.

We care about protecting children's right to high-quality, child-led play. Through the environments we help create, and the conversations we have in the community, we are working to keep play at the heart of childhood.

Our mission is to change the world through play.

growing kind 

Our Approach to Play

Play is how children make sense of the world. It supports social, emotional, cognitive, language and physical development, and enhances brain development.

We believe early childhood environments should be places where play is enabled, protected and prioritised. The resources and setups we help plan are chosen to inspire play, support engagement, and contribute to calmer, richer learning environments.

Our focus is on open-ended, high-quality materials that give children the chance to explore, make meaning and learn in ways that feel real, not forced. We consider schemas, developmental needs, inclusion, and the practical demands of centre life when selecting and recommending resources.

How to partner with us

The Process

We make it simple for you to get the resources and environments you need.

1

A Conversation

Tell us about your centre, the rooms you want to focus on, the ages of the children, any specific goals, and your budget. You can email, call, or send a quick message.

Most centres hear back from us within a few business days.

2

We Plan with you (or for you)

Some centres prefer to choose items from our recommendations. Others simply give us a budget and let us put together a tailored plan. Both options work. We can also review what you already have and suggest what will make the biggest difference. A tailored plan or shortlist is usually ready within 2–4 business days, depending on the size of the project.

3

Clear Quote

Mark up your changes to the shortlist and you'll receive a straightforward quote that is easy to share with management or your committee. We can stage purchases if you need to spread costs across terms or funding rounds. Quotes are typically provided within 2–4 business days of receiving your approved shortlist.

4

Order & Delivery

Once the quote is approved, we order your items from our suppliers. When packing we group and label items by room to help your team unpack and set up more easily. Dispatch times depend on the size of the order, we will always give you a clear timeframe upfront.
